## about

Video producer & motion designer with 10+ years' experience across film, motion graphics, 3D, and photography.

I craft and manage end-to-end brand and campaign content—from concept and storyboarding to on-location direction, editing, colour, and animation—translating complex ideas into engaging, results-driven narratives.

At Queue-it, I developed video strategies that grew viewership 6x and watch time 9x, producing and directing brand-awareness films and customer success stories in close partnership with marketing, product, and commercial teams.

I connect brand, story, and customer experience to create work that resonates, performs, and brings long-lasting value.

Based in Copenhagen.
